SUMMARY

Senior at Centennial High School (Class of 2027) pursuing undergraduate study in aerospace or mechanical engineering. Holds active university lab experience in materials science research on superconductor candidate materials.

TECHNICAL SKILLS

Materials characterization · Metal and metalloid sample handling · Superconductor materials research · CAD/3D modeling · 3D printing and fabrication · Lab safety and experimental protocol · Scientific data recording

EXPERIENCE

Materials Science Research Assistant — UMBC, Baltimore, MD *June 2024 – Aug 2024 | Nov 2025 – Present*

- Synthesized and tested combinations of metals and metalloids to evaluate candidate materials for superconductor development, working under faculty supervision in an active university research lab.
- Assisted graduate researchers in experimental procedures, maintaining precise handling protocols across multiple material iterations.

UMD researcher from July 2026-September 2026

Worked with Dr. Ashwani Gupta and his team of researchers for material science and CFD applications for his research

EDUCATION

Centennial High School — Ellicott City, MD *Expected Graduation: May 2027*

GPA: 3.95 unweighted | 4.87 weighted

ACTIVITIES

Co-President — CAD & 3D Design Club, Centennial High School 2025 August- 2026 June

- Led a club focused on CAD modeling and 3D fabrication, directing project workflows and instructing members in parametric design tools.
- Oversaw design-to-print cycles for club projects, coordinating technical instruction and production timelines.

Member of NMHS 2025 August- 2026 June

COMMUNITY SERVICE

Logged 75 volunteer hours maintaining and restoring hiking trails at Dunloggin Middle School, Ellicott City, MD.
